Traditionally, fish and wildlife agencies have focused their efforts on managing lands and waters outside of urban areas where the majority of fish and wildlife resources occur. However, habitats of regional and national significance often occur in urban areas and are of great value to fish and wildlife. These habitats also provide important public benefits such as open space, recreation, environmental education, aesthetics, flood control, and water quality enhancement. The Wapato Lake Units proximity to the urban environment of Forest Grove and Gaston would heighten public appreciation for the benefits wetland riverine habitats provide such as flood control,...
