

Analogical Modeling of Language

Filesize: 2.33 MB

Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

Book Condition: New. Publisher/Verlag: Springer Netherlands | 1. Structuralist Versus Analogical Descriptions
ONE important purpose of this book is to compare two completely different approaches to describing language. The first of these approaches, commonly called structuralist, is the traditional method for describing behavior. Its methods are found in many diverse fields - from biological taxonomy to literary criticism. A structuralist description can be broadly characterized as a system of classification. The fundamental question that a structuralist description attempts to answer is how a general contextual space should be partitioned. For each context in the partition, a rule is defined. The rule either specifies the behavior of that context or (as in a taxonomy) assigns a name to that context. Structuralists have implicitly assumed that descriptions of behavior should not only be correct, but should also minimize the number of rules and permit only the simplest possible contextual specifications. It turns out that these intuitive notions can actually be derived from more fundamental statements about the uncertainty of rule systems. Traditionally, linguistic analyses have been based on the idea that a language is a system of rules. Saussure, of course, is well known as an early proponent of linguistic structuralism, as exemplified by his characterization of language as "a self-contained whole and principle of classification" (Saussure 1966:9). Yet linguistic structuralism did not originate with Saussure - nor did it end with "American structuralism". | 1. Structuralist Versus Analogical Descriptions.- 2. An Overview of the Book.- 1: Problems with Rule Descriptions of Language.- 1. Three Basic Types of Language Behavior.- 2. Empirical Problems.- 3. Conceptual Problems.- 2: An Analogical Approach.- 1. An Overview of the Analogical Model.- 2. Constructing the Analogical Set for a Given Context.- 3. The Exponential Effect in a Saturated Deterministic Field.- 4. Predicting the Three Basic Behaviors...
